## MANULINK 2.0

### 1 - DESCRIPTION

i

Manulink 2.0 is a software program specifically designed to facilitate **use and door status monitoring** of a Manusa automatic door or control access device system in a local or remote way.

Manulink is specially useful when there is a system of several automatic doors or access control devices **distributed** through a building and it is required to have a centralized control of the status of each of them in every instant. It works together with the innovative Manusa communications device **Openlinx**.

The system allows in every moment to change device **mode**, verify status and alarm messages in real time and it gives the possibility to **program** for an entire year every desired mode change of the door in an automatic way.

Manulink allows to integrate image display of a video monitoring IP camera to control real status of the automatic door or access control device.

Also, it is possible to visualize data reporting coming from the integrated Manusa **people counting system**.

### 2 - COMPONENTS OF THE SYSTEM

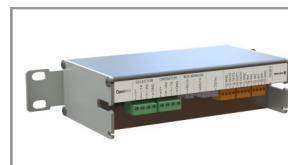

Manulink 2.0 system consists of:

- **Software Manulink 2.0**

Downloadable from Manusa web page downloading area [www.manusa.com](http://www.manusa.com)

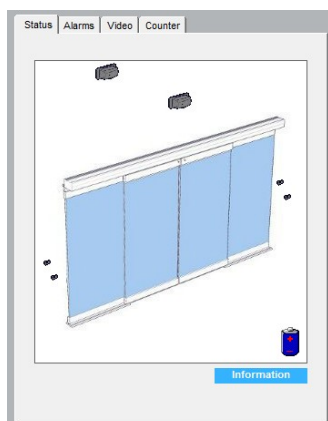

- **Openlinx**

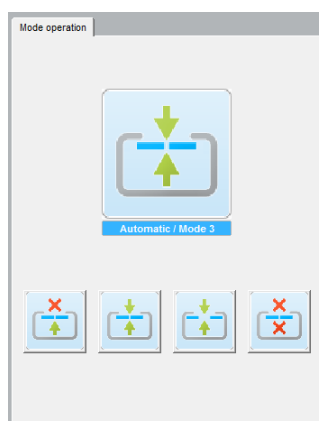

It is also required a PC with Microsoft Windows® operating system (not supplied by Manusa).

### 3 - FUNCTIONALITIES

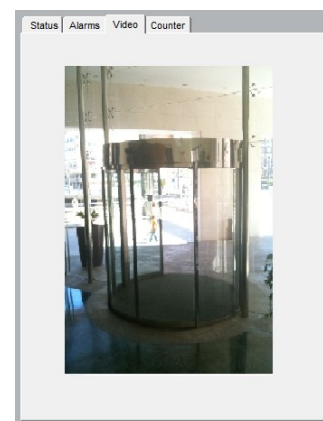

### Door status real time monitoring

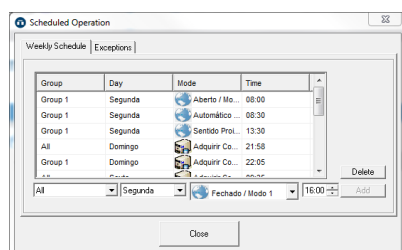

## Door mode change

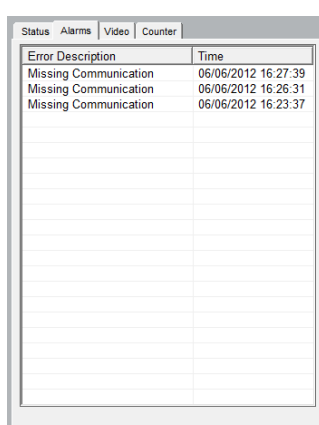

## IP Camera Video Display

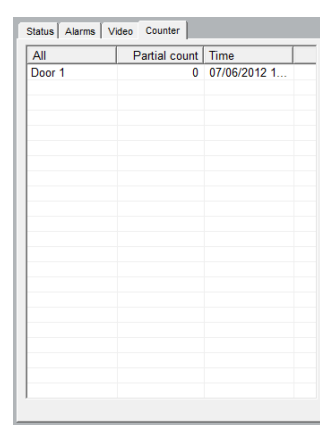

## Schedule programming for modes and counting

## Alarm log

## People counting system reporting

## 4 - TECHNICAL FEATURES

## OPERATING SYSTEMS

Windows 2000 Service Pack 4

Windows XP Service Pack 2

Windows Vista

Windows 7

## INTERNET NAVIGATORS

Internet Explorer V6 or later

Mozilla Firefox V1 or later

## PDF READERS

Acrobat Reader 4.01 or later
